Amendments to Claims

1. (Cancelled)

2. (Currently Amended) A fuel cell power plant ~~according to claim 1~~
~~wherein comprising:~~

a stack of fuel cells, each of said fuel cells having a reactant gas flow field
with an inlet and an outlet;

5 a source of pressurized reactant gas;

an ejector having a primary inlet interconnected with said source of reactant
gas, having a secondary inlet, and having an outlet, the outlet of said ejector being
connected to the inlets of said reactant gas flow fields; and

10 a blower having an inlet and an outlet, the inlet of said blower being
connected with the outlets of said reactant gas flow fields, the outlet of said
blower being connected to the secondary inlet of said ejector;

said ejector primary inlet ~~||is||~~ interconnected with said source of reactant
gas through a remote-sense pressure regulator which regulates the pressure of
reactant gas at said primary inlet in response to the pressure of reactant gas at said
15 reactant gas flow field inlets.

3. (Currently Amended) A fuel cell power plant ~~according to claim 1~~
~~wherein comprising:~~

a stack of fuel cells, each of said fuel cells having a reactant gas flow field
with an inlet and an outlet;

5 a source of pressurized reactant gas;

an ejector having a primary inlet interconnected with said source of reactant
gas, having a secondary inlet, and having an outlet, the outlet of said ejector being
connected to the inlets of said reactant gas flow fields; and

- 3 -

10 a blower having an inlet and an outlet, the inlet of said blower being
connected with the outlets of said reactant gas flow fields, the outlet of said
blower being connected to the secondary inlet of said ejector;

15 said ejector primary inlet [lis] interconnected with said source of reactant
gas through a remote-sense pressure regulator which regulates the pressure of
reactant gas at said primary inlet in response to the pressure of reactant gas at said
reactant gas flow field outlets.

4. (Cancelled)

5. (Cancelled)
